Policy on teaching two courses in one semester

It was decided, based on the recommendation of the Teaching Committee that: 1) teaching two courses in one semester should be discouraged. 2) If scheduling of courses and the need for instructors requires that an instructor teaches two courses in a single semester, they should not be penalized. 3) The teaching of two courses in a single semester will be allowed if the course evaluations for that instructor in those courses were above the college average the previous time the courses were offered.
