HONR 229L Final Paper

On class website, it is stated:

Grades will be determined based on short writing assignments for each reading (40%), a mid-term paper (35%), evaluation of student led discussion and class participation during the semester (10%), and a brief final paper that reflects each student’s view of the energy plan that has been negotiated, defending (or perhaps critiquing) the treaty from their role in the negotiation, and connecting to the real world issues related to the governance of climate change (15%).

as well as:

**Final Paper:** 3 to 5 pages single spaced. For the last few weeks of class students will break into three groups, select roles within each group, and assemble an energy plan. The plans will be presented Wed, 6 Dec. Final paper is due 11 Dec 2017 (last day of the semester). The paper should reflect your view of the energy plan, defending or critiquing the plan from your perspective in the framing of the plan. You are welcome to also include commentary on the problems and/or success the real-world is having regarding a transition towards renewable energy.

Shall slightly modify **Final Paper** requirement in the following fashion:

If you are one of the three Presidents, you are asked to:

Submit a 3 to 5 page, single spaced paper that expresses your view of the energy plan, the economic development plan, the population growth plan (if appropriate) plus of course the International Agreement, defending or critiquing these documents from your perspective as leader of either China, India, or the US. You are welcome to also include commentary on the problems and/or success the real-world is facing regarding the transition to renewable energy.

If you are one of the three Negotiators, you are asked to:

Submit a 3 to 5 page, single spaced paper that includes the International Agreement (this is included in the page count!) as well as your view of the International Agreement, defending or critiquing this plan from your perspective as negotiator for either China, India, or the US. You are welcome to also include commentary on the challenges the real-world is facing regarding the transition to renewable energy.

If you are one of the three Energy Ministers, you are asked to:

Submit a 3 to 5 page, single spaced paper that includes the Energy Plan from your region (this is included in the page count!) as well as your view of the Energy Plan, defending or critiquing this plan from your perspective as Energy Minister for either China, India, or the US. You are welcome to also include commentary on the challenges the real-world is facing regarding the transition to renewable energy.

If you are one of the Senators, you are asked to:

Submit a 3 to 5 page, single spaced paper that includes the Economic Development Plan and, if applicable, the Population Growth Plan from your region (these are included in the page count!) as well as your view of the plan(s), defending or critiquing this (these) plan(s) from your perspective as Senator for either China, India, or the US. You are welcome to also include commentary on the challenges the real-world is facing regarding the transition to renewable energy.

**Final paper due 11 December 2017, at 11:59 pm, and should be submitted via email to Ross & Walt. If you need more time, an extension must be requested prior to the due date.**
