1

## Chapman Chemistry

- Production of *stratospheric* O<sub>3</sub> initiated when O<sub>2</sub> is photodissociated by UV sunlight
- O<sub>3</sub> formed when resulting O atom reacts with O<sub>2</sub> :

- O<sub>3</sub> removed by photodissociation (UV sunlight) or by reaction with O :

This reaction sequence was first worked out in the 1930s by Sydney Chapman,  
an English mathematician and geophysicist

This material may not be reproduced or redistributed, in whole or in part, without written permission from Ross Salawitch or Tim Canty.

2

## Chapman Chemistry

- The cycling between O and O<sub>2</sub> (rxns 2 and 3) occurs *much* more rapidly than leakage into (rxn 1) or out of the system (rxn 4)
- The sum O + O<sub>3</sub> is commonly called “*odd oxygen*”

Rxn (1) produces two *odd oxygen* molecules  
 Rxn (4) consumes two *odd oxygen* molecules  
 and reactions 2 and 3 recycle *odd oxygen* molecules

This material may not be reproduced or redistributed, in whole or in part, without written permission from Ross Salawitch or Tim Canty.

3

## Chapman Chemistry

- The concentration of *odd oxygen* reflects a balance between production and consumption:

$$2 k_4 [\text{O}] [\text{O}_3] = 2 J_1 [\text{O}_2] \quad (5)$$

- Similarly the abundance of O<sub>3</sub> (or O) reflects a balance between P & L of fast *inner cycle*:

$$k_2 [\text{O}] [\text{O}_2] [\text{M}] = J_3 [\text{O}_3] \quad (6)$$

- Rearranging (6) yields:

$$[\text{O}] = \frac{J_3 [\text{O}_3]}{k_2 [\text{O}_2] [\text{M}]} \quad (7)$$

- Subbing this expression into (5) yields:

$$[\text{O}_3] = \left( \frac{J_1 k_2}{J_3 k_4} \right)^{1/2} f_{\text{O}_2} [\text{M}]^{3/2} \quad (8)$$

where  $f_{\text{O}_2}$  = O<sub>2</sub> mixing ratio, or ~0.21

4

# Chapman Chemistry

$$[\text{O}_3] = \left( \frac{J_1 k_2}{J_3 k_4} \right)^{1/2} f_{\text{O}_2} [\text{M}]^{3/2}$$

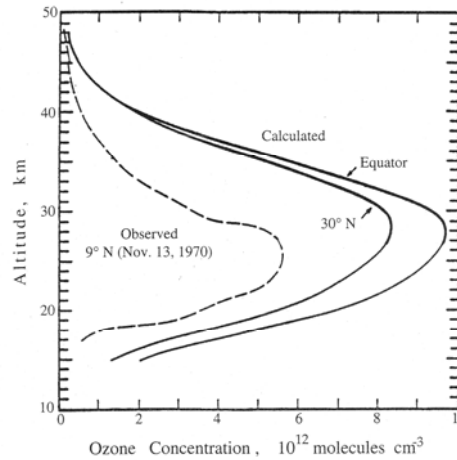

FIGURE 4.6 Comparison of stratospheric ozone concentrations as a function of altitude as predicted by the Chapman mechanism and as observed over Panama (9° N) on November 13, 1970.

$[\text{O}_3]$  falls off with increasing altitude (high in stratosphere), at a rate determined by  $[\text{M}]^{3/2}$ , because:

$[\text{O}_3]$  falls off with decreasing altitude (low in stratosphere) due to a rapid drop in  $J_1$ , reflecting:

Observed  $[\text{O}_3] < \text{Chapman } [\text{O}_3]$  : why !?!

5

# Chapman Chemistry

$$\text{Lifetime of Odd Oxygen} = \frac{[\text{O}] + [\text{O}_3]}{2 J_1 [\text{O}_2]} \approx \frac{[\text{O}_3]}{2 J_1 [\text{O}_2]} \quad (9)$$

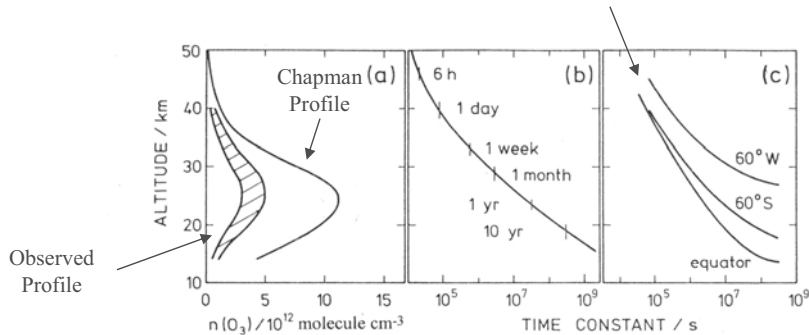

FIGURE 3.7 (a) Vertical profile of ozone number density calculated from Equation (3.9). The hatched area shows the range of observations at low latitudes from the data of Krueger (1969), Randhawa (1971), and Mauersberger *et al.*, (1981). (b) Time constant for the approach to the photostationary state of ozone calculated from Equation (3.11). (c) Ozone replacement times calculated from Equation (3.12) by Johnston and Whitten (1973), here for 60° N, summer and winter, and at the equator.

Warneck, Chemistry of the Natural Atmosphere, 2000

**Analysis of (9) and dynamical models shows that *transport* exerts a major influence on odd oxygen (e.g., ozone) below about 30 km altitude**

6

# Stratospheric Photochemistry

The real stratosphere is a bit more complex:

Table 14.3 Reactions Included in Contemporary Models of Stratospheric Chemistry

$O_2 + h\nu \rightarrow O + O$	$O_3 + h\nu \rightarrow O(^1D) + O_2$
$O(^1D) + O_2 \rightarrow O + O_2$	$O + O_2 + M \rightarrow O_3 + M$
$O + O_3 \rightarrow O_2 + O_2$	$O + O + M \rightarrow O_2 + M$
$O(^1D) + N_2O \rightarrow NO + NO$	$O(^1D) + N_2O \rightarrow N_2 + O_2$
$O + NO_2 \rightarrow NO + O_2$	$NO_2 + h\nu \rightarrow NO + O$
$O_3 + NO \rightarrow NO_2 + O_2$	$O + HNO_3 \rightarrow OH + NO_2$
$O + NO + M \rightarrow NO_2 + M$	$O + NO_2 + M \rightarrow NO_3 + M$
$O_3 + NO_2 \rightarrow O_2 + NO_3$	$H + NO_2 \rightarrow OH + NO$
$HO_2 + NO_3 \rightarrow OH + NO_2$	$NO_2 + OH \rightarrow HNO_3$
$HNO_3 + h\nu \rightarrow OH + NO_2$	$HNO_3 + OH \rightarrow H_2O + NO_3$
$NO + OH \rightarrow HNO_2$	$NO_2 + HO_2 \rightarrow HNO_2 + O_2$
$HNO_2 + h\nu \rightarrow OH + NO$	$HNO_2 + OH \rightarrow H_2O + NO_2$
$HO_2 + NO_2 \rightarrow HNO_4$	$HNO_4 \rightarrow HO_2 + NO_2$
$HNO_4 + h\nu \rightarrow OH + NO_3$	$HNO_4 + OH \rightarrow H_2O + NO_2 + O_2$
$NO_3 + h\nu \rightarrow NO_2 + O$	$NO_3 + h\nu \rightarrow NO + O_2$
$NO_3 + NO \rightarrow 2NO_2$	$NO_3 + NO_2 \rightarrow NO + O_2 + NO_2$
$NO_3 + NO_3 \rightarrow 2NO_2 + O_2$	$NO_2 + NO_3 \rightarrow N_2O_5$
$N_2O_5 \rightarrow NO_2 + NO_3$	$N_2O_5 + h\nu \rightarrow NO_2 + NO_3$
$NO + h\nu \rightarrow N + O$	$N + O_2 \rightarrow NO + O$
$N + O_3 \rightarrow NO + O_2$	$N + NO \rightarrow N_2 + O$
$N + NO_2 \rightarrow N_2O + O$	$NH_3 + OH \rightarrow NH_2 + H_2O$
$NH_2 + O_3 \rightarrow NO_2 + \dots$	$NH_2 + NO \rightarrow N_2 + \dots$
$ClO + NO \rightarrow Cl + NO_2$	$ClO + NO_2 \rightarrow ClONO_2$
$N_2O + h\nu \rightarrow N_2 + O$	$Cl + HNO \rightarrow HCl + NO_2 + O_2$
$ClONO_2 \rightarrow ClO + NO_2$	$ClONO_2 + h\nu \rightarrow O + ClONO$
$ClONO_2 + h\nu \rightarrow Cl + NO_3$	$ClONO_2 + O \rightarrow ClO + NO_3$
$ClONO_2 + OH \rightarrow HOCl + NO_3$	$ClONO_2 + H_2O \text{ (aerosol)} \rightarrow HOCl + HNO_3$
$ClONO_2 + HCl \text{ (aerosol)} \rightarrow Cl_2 + HNO_3$	$N_2O_5 + H_2O \text{ (aerosol)} \rightarrow 2HNO_3$
$N_2O_5 + HCl \text{ (aerosol)} \rightarrow HNO_3 + ClONO_2$	$ClONO_2 + h\nu \rightarrow Cl + NO_2$
$NO + ClONO_2 \rightarrow ClONO + NO_2$	$ClONO + h\nu \rightarrow Cl + NO_2$
$Cl + NO_2 \rightarrow ClONO$	$Cl + NO_2 \rightarrow ClONO_2$
$ClONO_2 + O \rightarrow ClONO + O_2$	$CH_3OO + NO \rightarrow RO + NO_2$
$NO + OClO \rightarrow NO_2 + ClO$	$O(^1D) + N_2 + M \rightarrow N_2O + M$
$O + NO_3 \rightarrow O_2 + NO_2$	$NO_3 + O_2 \rightarrow NO + O_2 + O_2$

7

# Stratospheric Photochemistry

plus these :

$NH_2 + NO_2 \rightarrow N_2 + \dots$	$O(^1D) + H_2 \rightarrow OH + H$
$O(^1D) + H_2O \rightarrow OH + OH$	$O(^1D) + CH_4 \rightarrow H_2 + H_2CO$
$O(^1D) + CH_4 \rightarrow OH + CH_3$	$CO_2 + h\nu \rightarrow CO + O$
$O + H_2 \rightarrow OH + H$	$O + HO_2 \rightarrow OH + O_2$
$O + OH \rightarrow O_2 + H$	$O_3 + H \rightarrow OH + O_2$
$O + H_2O_2 \rightarrow OH + HO_2$	$O_3 + H \rightarrow OH + O_2$
$O + H_2O_2 \rightarrow OH + HO_2$	$O_3 + HO_2 \rightarrow OH + O_2 + O_2$
$O_3 + OH \rightarrow HO_2 + O_2$	$HO_2 + h\nu \rightarrow O + OH$
$H_2O + h\nu \rightarrow H + OH$	$H + O_2 + M \rightarrow HO_2 + M$
$H_2O_2 + h\nu \rightarrow OH + OH$	$H + HO_2 \rightarrow H_2 + O_2$
$H + HO_2 \rightarrow OH + OH$	$H + H_2O_2 \rightarrow OH + H_2O$
$H + HO_2 \rightarrow H_2O + O$	$OH + OH \rightarrow H_2O + O$
$H + H_2O_2 \rightarrow H_2 + HO_2$	$OH + H_2O_2 \rightarrow H_2O + HO_2$
$OH + HO_2 \rightarrow H_2O + O_2$	$OH + H_2 \rightarrow H_2O + H$
$HO_2 + HO_2 \rightarrow H_2O_2 + O_2$	$OH + CH_4 \rightarrow CH_3 + H_2O$
$OH + CO \rightarrow CO_2 + H$	$CH_3OO + HO_2 \rightarrow ROOH + O_2$
$CH_4 + h\nu \rightarrow \dots H_2CO$	$CH_3OOH + h\nu \rightarrow CH_3O + OH$
$CH_3OO + CH_3OO \rightarrow R_2O_2 + O_2$	$H_2CO + OH \rightarrow HCO + H_2O$
$CH_3OOH + OH \rightarrow RO + H_2O$	$H_2CO + h\nu \rightarrow H_2 + CO$
$H_2CO + h\nu \rightarrow H + HCO$	
$CH_4 + h\nu \rightarrow H_2 + \dots$
